London and Sisimiut are very different aren't they. Did you manage to find some similarities?

Do you think the weather is the same in each place? Let's have a look.

**BACK**

**NEXT**

Sisimiut is in the Arctic Circle so during the winter months it snows heavily and the city is covered. You can also see icebergs in the ocean. Winter in London is a bit different. It rains a lot and can be very foggy and cloudy. Sometimes it snows but not often.

Summer is very short in Sisimiut. The days are quite warm and the sun shines, which melts the snow and ice.

Summer in London lasts much longer and is warmer. Many flowers and plants bloom in London over summer.
